Appl. Statist. (1995)
44, *No.* 4, *pp.* 553–555

Author Index: Vol. 44, 1995

Aitken, C. G. G., Shaw, J. and Talbot, M. Contaminant detection in the visual inspection of seed samples 431
Albert, J. R. G. and Baxter, L. A. Applications of the EM algorithm to the analysis of life length data 323
Alwan, L. C. and Roberts, H. V. The problem of misplaced control limits 269
Arjas, E. and Liu, L. Assessing the losses caused by an industrial intervention: a hierarchical Bayesian approach 357
Atkinson, A. C., Demetrio, C. G. B. and Zocchi, S. S. Optimum dose levels when males and females differ in response 213
Aykroyd, R. G. Partition models in the analysis of autoradiographic images 441
Balagtas, C. C., Becker, M. P. and Lang, J. B. Marginal modelling of categorical data from crossover experiments 63
Baxter, L. A. See under *Albert, J. R. G.*
Baxter, M. J. Standardization and transformation in principal component analysis, with applications to archaeometry 513
Becker, M. P. See under *Balagtas, C. C.*
Best, N. G. See under *Gilks, W. R.*
Blyth, S. The dead of the Gulag: an experiment in statistical investigation 307
Böckenholt, U. See under *van Duijn, M. A. J.*
Caulcutt, R. The rights and wrongs of control charts 279
Chan, L. K. and Mak, T. K. A regression approach for discovering small variation around a target 369
Christen, J. A. See under *Wilson, S. R.*
Currie, I. D. Maximum likelihood estimation and Mathematica 379
Demetrio, C. G. B. See under *Atkinson, A. C.*
Discussion of the papers by Alwan and Roberts, and Caulcutt 289
van Duijn, M. A. J. and Böckenholt, U. Mixture models for the analysis of repeated count data 473
Elston, D. A. and Proe, M. F. Smoothing regression coefficients in an overspecified regression model with interrelated explanatory variables 395
Fitzmaurice, G. M. and Lipsitz, S. R. A model for binary time series data with serial odds ratio patterns 51
Flanagan, R. See under *Ramsay, J. O.*
Garside, S. See under *Rothery, P.*
Gilks, W. R., Best, N. G. and Tan, K. K. C. Adaptive rejection Metropolis sampling within Gibbs sampling 455
Gilmour, S. G. and Mead, R. Stopping rules for sequences of factorial designs 343
Guess, F. M. See under *Reiser, B.*
Guttman, I. See under *Reiser, B.*
Heuch, I. See under *York, J.*
Hiby, L. See under *Rothery, P.*
Jonathan, P. See under *Krzanowski, W. J.*
Koehler, K. J. See under *Morel, J. G.*
Krzanowski, W. J., Jonathan, P., McCarthy, W. V. and Thomas, M. R. Discriminant analysis with singular covariance matrices: methods and applications to spectroscopic data 101
